EDUCATION	Department of Mathematics, Inha University <i>Undergraduate student. in College of Natural Sciences</i> • Advisor: Prof. Yoonsuk Hyun • Research area: Machine/Deep Learning Department of Statistics, Inha University <i>Undergraduate student. in College of Natural Sciences</i>	Incheon, Korea 2021 - 2025 (<i>expected</i>) Incheon, Korea 2021 - 2025 (<i>expected</i>)
PROJECTS	Development of a Conversational AI Service for Restaurant Recommendations in Jeju Island using LLM <i>Competition by Korea Association for ICT Promotion (KAIT)</i> Development of LLM AI for Solving Mathematics Problems <i>Competition by Inha University</i> Development of a Drowsiness Prevention System App Utilizing Open API <i>Competition by ETRI</i> Scientific Computing and Machine Learning Research <i>Inha University, MILab</i> • Poster Presentation at the 2023 KSIAM Fall Conference (Korean Society for Industrial and Applied Mathematics), LPI : Locational Persistent Image. • Wafer Defect Pattern Recognition based on Topological Data Analysis. Bilateral Research on Artificial Intelligence Technology Development and Mathematical Problem Solving <i>Inha University, MILab</i>	2024.09 - 2024.10 2024.08 - 2024.10 2023.10 - 2023.12 2023.07 - 2023.11 2023.03 - present
INTERNSHIPS	Korea Institute of Science and Technology (KIST) Seoul, Korea • Advisor: Ph.D. Changhyuk Lee • Participated in Real time Behavior classification GUI development. • Developed code for Angle Sensitive Pixel (ASP) in neural probes and arrays.. • Implemented reconstruction code for Neural Probe ASP. • Developed an in silico model explaining simultaneous motor and non-motor symptoms of Parkinson's disease, and designed precise target control techniques. • Developed next-generation 3D image sensors using near-infrared direct time-of-flight technology.	2023.12 - 2024.06
AWARDS AND HONORS	• National Assembly Public Data Utilization Competition, Encouragement Award • 2023 ETRI Open API Utilization Contest, President's Award from ETRI • NVIDIA DLI Certificates, Building Transformer-Based Natural Language Processing Applications, • 2024 Standard Co-op Program, Excellence Award for Best Internship Report	2024.06 2023.11 2022.08 2024.05
SKILLS	Languages: Korean, English. Programming: Python, MATLAB, Cadence.
